INFORMATION

KeyPlex 1000 DP is a formulation of micronutrients most often found deficient in commercial crops and trees. It contains alpha-keto acids, which may facilitate utilization of micronutrients, and increase resistance to environmental stress. It also contains humic acid, which may enhance soil micronutrient availability. KeyPlex 1000 DP is formulated for foliar application to prevent

and correct micronutrient deficiencies when used as directed. Maintaining proper levels of micronutrients usually results in increased plant vigor, better yields, superior fruit size and quality, and longer shelf life.

COMPATIBILITY

KeyPlex 1000 DP, when added to the spray tank water, will lower the water pH, and can be used in combination with pesticides. However, in unfamiliar mixtures use a "jar compatibility" test.

DIRECTIONS FOR USE

FOLIAR APPLICATION: *Tomatoes and other vegetables, grapes, small fruits, and turf:* Use 1 to 2 quarts of KeyPlex 1000 DP per acre in a minimum of 20 gallons of water with ground spray equipment. At least six applications are recommended on most crops per crop or per season. Addition of 3 to 5 pounds of urea or potassium nitrate per 100 gallons of water will aid leaf assimilation. *Citrus Trees:* Use 3 quarts of KeyPlex 1000 DP per acre per application every six weeks during the growing season. During periods of heavy rainfall, apply every thirty days. Addition of 3 to 5 pounds of urea or potassium nitrate per 100 gallons of water will aid leaf assimilation. *Tropical fruits, peaches and other deciduous tree fruits, pecans and other nuts:* Use 2 to 3 quarts of KeyPlex 1000 DP per acre per application. Recommended minimum application 2 gallons per acre per year. Addition of 3 to 5 pounds of urea or potassium nitrate per 100 gallons of water will aid leaf assimilation. **AERIAL APPLICATION:** Use applicable rate (see above) of KeyPlex 1000 DP per acre in at least 15 gallons of water per acre.

CONDITIONS OF SALE
