### INFORMATION

KeyPlex 250 DP is a formulation of micronutrients most often found deficient in commercial crops and trees. It contains alpha-keto acids, which may facilitate utilization of micronutrients, and increase resistance to environmental stress. It also contains humic acid, which may enhance soil micronutrient availability. KeyPlex 250 DP is formulated for foliar application or fertigation to prevent and correct micronutrient deficiencies when used as directed.

Maintaining proper levels of micronutrients usually results in increased plant vigor, better yields, superior fruit size and quality, and longer shelf life.

### COMPATIBILITY

KeyPlex 250 DP, when added to the spray tank water, will lower the water pH, and can be used in combination with pesticides. However, in unfamiliar mixtures use a "jar compatibility" test.

### DIRECTIONS FOR USE
