Complexed Micronutrients

GUARANTEED ANALYSIS

Iron (Fe).....	0.50%
0.15% Soluble Iron	
0.35% Complexed Iron	
Manganese (Mn).....	2.00%
2.00% Complexed Manganese	
Zinc (Zn).....	6.00%
6.00% Complexed Zinc	

Derived From: Iron Nitrate, Manganese Glucoheptonate, Zinc Glucoheptonate, and Iron Glucoheptonate.

FOR USE ON THE FOLLOWING CROPS

Citrus, tropical fruits, stone fruits, pome fruits, nuts grapes, and corn or other row crops.

Information regarding the contents and levels of metals in this product is available on the Internet at: <http://www.aapfco.org/metals.htm>

INFORMATION

KeyPlex 625 D is a formulation of micronutrients most often found deficient in citrus trees, other fruit trees, nut trees and corn. KeyPlex 625 D is formulated for foliar application or fertigation to prevent and correct micronutrient deficiencies when used as directed. Maintaining proper levels of micronutrients usually results in increased plant vigor, better yields, superior fruit size and quality, and longer shelf life.

COMPATIBILITY

KeyPlex 625 D, when added to the spray tank water, will lower the water pH, and can be used in combination with pesticides. However, in unfamiliar mixtures use a "jar compatibility" test.

DIRECTIONS FOR USE

FOLIAR APPLICATION: *Mature Trees:* Use 2 to 3 quarts of KeyPlex 625 D per acre in a minimum of 50 gallons of water with ground spray equipment. Minimum total annual application of 2 gallons per acre is recommended. Addition of 3 to 5 pounds of urea or potassium nitrate per 100 gallons of water will aid leaf assimilation.

Immature Trees: Use 2 quarts of KeyPlex 625 D per 100 gallons of water and thoroughly wet leaf surfaces. Addition of 3 to 5 pounds of urea or potassium nitrate per 100 gallons of water will aid leaf assimilation. *Grapes:* Use 1 to 2 quarts of KeyPlex 625 D per acre in a minimum of 50 gallons of water with ground spray equipment.

Addition of 2 to 3 pounds of urea or potassium nitrate per 100 gallons of water will aid leaf assimilation. *Corn and Other Row Crops:* Use 1 to 2 quarts of KeyPlex 625 D per acre in a minimum of 20 gallons of water with ground spray equipment. Addition of 3 to 5 pounds of urea or potassium nitrate per 100 gallons of water will aid leaf assimilation. **AERIAL APPLICATION:** Use 2 quarts of KeyPlex 625 D in a minimum of 15 gallons of water per acre.

CONDITIONS OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness of a particular product expressed or implied extends to the use of this product contrary to label instructions or under abnormal conditions not reasonably foreseeable by the seller, and buyer assumes the risk of any such use.

CAUTION

KEEP OUT OF THE REACH OF CHILDREN

ANTIDOTE

Ingestion: Do not induce vomiting. **Eyes:** Rinse with copious quantities of water for at least 5 minutes. **Skin:** Wash with soap and water. Remove contaminate clothing. **Inhalation:** Remove patient from contaminated area. In all cases, patient seeing a physician should follow emergency procedures.
