

KeyPlex SPORAN

Fast Acting, Sustainable Contact Fungicide

Sporan is a broad spectrum, contact fungicide that prevents and controls fungal attacks within days of application. It works by disrupting the cell wall of spores and hyphae.

Active Ingredients

Rosemary Oil	16.0%
Clove Oil	10.0%
Thyme Oil	10.0%
Peppermint Oil	2.0%
Other Ingredients*	62.0%
Total	100.0%

*Butyl lactate, polyglycerylolate

Key Benefits of SPORAN

- Broad spectrum label for use on fruits, nuts, citrus and vegetable crops, as well as roses grown in greenhouses and nurseries.
- Emulsifiable concentrate
- Zero REI or Pre-Harvest Intervals
- May be applied anytime, including day of harvest
- OMRI Listed
- FIFRA 25(b) exempt

Application and Use

For best results, maintain constant agitation in spray equipment. For optimal performance, do not mix with coldwater (less than 45° F) and do not apply when the temperature is over 90 degrees. The use of an adjuvant (spreader and/or penetrant) is highly recommended for improving performance. For application methods and rates, please refer to label. Lower rates are recommended for light to moderate infestations and higher rates for heavy infestations. Repeat application as required to maintain the desired level of control.
